## Company Overview

JFAM Enterprise Applications, Inc. is a Minority and Veteran owned e/Business consulting firm based in Atlanta Ga. devoted to providing its clients with the best IT consultant portfolio in the world. One of the keys to our success is our ability to extend our clients capabilities by isolating and bringing to realization a wide spectrum of certified ERP/CRM consultants to their projects.

Our experienced consultants understand how to leverage powerful thinking inside the clients organization and how to integrate those innovative ideas with state of the art processes and technologies to improve top-line, bottom-line performance along with their capital efficiency.

Through a mixture of collaboration, industry analysis, knowledge of the interdependence of business processes and IT technology, JFAM EA strives to always “whisper wise consul” to its clients in addressing their understanding the ‘best-practice’ methodology for their IT business transactional events within the context of their industry and trading partners landscape.

## Representative Clients History
