EDUCATION:

MBA from New York University and served 13 years in the United States Marine Corps.

B2B Enterprise Applications proudly announced the re-branding of its company to **JFAM Enterprise Applications**.

JFAM Enterprise Applications, Inc. is a national business and technology resource staffing powerhouse devoted to providing its clients with the best contract consultants in the world.

JFAM EA is committed to delivering innovation, through collaboration with our clients. We know that our customers have complex businesses that require sophisticated IT resources. Our talent delivery solutions are carefully tailored, combining industry expertise, intellectual property and technology in a way that achieves "best skill-sets portfolio" resource realization.

We continually explore, create and adopt new innovations to keep our resource isolation and talent delivery methodology ahead of the curve.

In short, JFAM EA can mobilize the right people, skills and technologies to help clients improve their IT environment performance.

In April 2003, after a decade of periodic alliances, B2B Workforce established a Mentor-Protégé' relationship with Mr. Maddox and formed B2B Enterprise Applications (B2B EA) which is a minority owned (African American) and diversity certified organization with a slightly different IT resource delivery model.

With B2B WF providing the IT resource delivery technical direction and Mentorship, this young company prospered, quickly gaining a reputation for innovative and high-quality IT resource realization and gained a solid 'past performance' history with several premier clients and 1st tier alliance partners.

The success of a Mentor-Protégé' relationship is the graduation of the Protégé'. Given our Alliance Scorecard and Past-Performance, we have started planning for our graduation from the Protégé' ranks. We are looking forward to the day when we are soaring through the future side-by-side with our mentors and alliance partners and not under their wings.

Therefore, in January 2008, B2B Enterprise Applications proudly announced the re-branding of its company, via the d/b/a methodology to JFAM Enterprise Applications.
